

Warehouse-IT Online

The warehouse-IT online system plugs into any of our warehouse-IT systems and allows clients to login to the system via the internet and view\manage their warehouses. Clients can only view warehouses relating to their login credentials. Depending on the level of access a client has been given, the client can do the following functions:

- *View stock levels*
- *Edit bins\warehouse details*
- *Upload images of items to specific bins*
- *Process online GRN requests*
- *Create their own home page for their online warehouse.*
- *Advertise products and or partners.*

The warehouse-IT online system is extremely powerful and remains at the forefront of online data warehousing technology. It can be used by an existing warehousing company that wants to give their clients complete visibility of their products being warehoused, or by a retailer who wishes to advertise & sell their products via
