

Winfreight Online

WinFreight (TM)

The Winfreight Online system is an internet based processing\tracking system that plugs into any of our Winfreight versions, and can also be used as a standalone system. The system is entirely internet based; eliminating the need for any installation\configuration...all that is need is an active internet connection.

The Winfreight Online system is split into 4 modules that can be purchased separately or as a whole:

- **Client Track & Trace**

Allows clients to log in and view their waybill\POD information. If available - scanned POD images can also be downloaded or printed. Client have the ability to search by date range, waybill no, or unique reference no. POD reports\downloads are also available for client use - eliminating time consuming queries.

- **Branch Track & Trace**

Allows staff to process\retrieve information from anywhere in the country\world providing they have an active internet connection. No installation/configuration is required, making this a cost effective solution when setting up additional branches or satellite offices. Another major advantage of this system is that it allows pre-configured users to process on the system from home, fitting in with a new global trend of setting up employee home offices. Secure login credentials & session timeout policies are used at all times to ensure high levels of data security. Below are some of the features of the branch Track & Trace system:

- Waybill Capture/Billing
- POD capture/retrieval
- Customer/rates/3rd party management
- reporting

- **3rd Party Track & Trace**

Allows your 3rd party's to log into the system and capture POD information relating to deliveries they have done on behalf of you. This eliminates timely delays in getting POD information back to your office once a delivery has been done.

- **Online in-house system**

The online system assists your in-house staff with Waybill\Label printing, waybill capture\billing, quoting, and manifesting, to streamline your in-house operations. The system is live at all times, eliminating the need to transfer data between the in-house and your head office. As soon as a waybill is captured at in-house level, it will be visible to the rest of your network.
