

WinFreight ^(TM)

Winfreight

Winfreight is a freight management system developed to effectively control all the daily operations within the logistics industry. The system centralizes all data input across the different function areas into a single system, making it easier for business owners/managers to control the flow of data within their business. The Winfreight system has 3 variations which were specifically designed according to industry demand, as below:

- **Winfreight STD**
 - *Courier & distribution.*
- **Winfreight Broker**
 - *Road Freight & Brokerage.*
- **Winfreight Air**
 - *Air Freight agents.*

Winfreight Additional Plug-ins

- **Client In-house system** - The Winfreight in-house system is a standalone system that is easily deployed to your client's premises to assist with Waybill\Label printing, waybill capture\billing, quoting, and manifesting. Data is electronically transferred to the head office to prevent double capturing and streamline the entire in-house process.
- **POD Mailer** - The POD EMailer is an automatic response system that will reply to email request with the requested POD information. Clients simply send an email to an email address that has been designated for these requests (pod@yourcompany.co.za), with the waybill number\s in the subject line and the system will reply to the email with the POD details. If an image is available, the system will attach the image to the reply. The benefits of this system are two fold:
 - Eliminate the need for over staffed POD departments to handle all incoming POD requests.
 - Give the client some piece of mind that they can request a POD anytime of the day and get a quick & effective response.

The POD EMailer Plus will also allow you to setup an “Info@yourcompany.co.za” address, which will automatically send clients your company brochure when they send an email to this address.

Please view our system features on the next page.

Some Standard Features:

- *Automatic Waybill Billing (Client & 3rd Party)*
- *Waybill Quick Capture - Ensure freight is manifested on time.*
